SUMMARY

Computer Science (AI) student seeking roles in SDE, AI, and ML. Skilled in full-stack development (Django, React.js, Node.js), ML pipelines, REST API design, and cloud deployment (Render, Vercel). Builds end-to-end products with real-world use cases.

TECHNICAL SKILLS

Programming Languages: C, Java, Python, C++

Web Development: HTML, CSS, Flask, Django REST Framework, React.js, Node.js, Express.js

Databases: MySQL, MongoDB, DBMS

Tools & Frameworks: Git, Scikit-learn, PyTorch, Pandas, Hugging Face, JWT, REST APIs, Multer, Bcrypt, Groq API

Concepts: DSA, OOPs, Machine Learning, Deep Learning, NLP, Computer Vision

Cloud & Deployment: Render (Flask/Django), Vercel (React), Railway, GCP (basics)

WORK EXPERIENCE

SDE Intern

Jan 2026 – Present

Kabadi Techno

- Developed a full-stack GST Billing & Invoice Management System using Django REST Framework (backend) and React.js (frontend).
- Implemented JWT authentication, role-based dashboards for GST/Non-GST users, GST verification, and automated invoice generation with PDF/Excel exports.
- Integrated wallet credits, UPI/cash payment simulation, barcode scanning, referral system, and real-time notifications.

KEY PROJECTS

Loan Lending Website | *React.js, Node.js, Express.js, MongoDB, JWT, Multer, TailwindCSS*

2025

- Built a full-stack peer-to-peer loan lending platform connecting borrowers and lenders with role-based dashboards, loan application management, and real-time status updates.
- Implemented JWT authentication, secure document upload via Multer, CIBIL score checker, loan eligibility validator, UPI payment simulation, and an integrated chat assistant.
- Designed RESTful APIs with Node.js and Express.js, MongoDB for data storage, and a responsive React.js frontend with Framer Motion animations.

Career Pilot – Student Job Readiness Platform | *Python, Flask, React.js, ML, SQL*

2025

- Built a career guidance platform for 1st–4th year students with personalized roadmaps (SDE, Data Science, AI/ML), skill gap analysis, and curated resource recommendations.
- Designed role-based dashboards for students and mentors with milestone tracking and mentor feedback workflows; deployed on **Render + Vercel**.

Crop Prediction Web Application | *Python, Scikit-learn, Flask, NumPy, HTML/CSS*

2024

- Trained an ML classification model on soil and climate features; serialized with pickle and deployed live on **Render** via Flask with a real-time prediction interface.

EDUCATION

Banasthali Vidyapith

Niwai, Rajasthan

Bachelor of Technology – Computer Science (Artificial Intelligence)

Jul 2022 – Jun 2026

ACHIEVEMENTS & ACTIVITIES

- Winner – Microsoft Ideathon | Top 200 – Flipkart Girls Want to Code | Selected for Level 1 of Multiple Hackathons
- Solved 300+ LeetCode Problems (30+ day streak) | Member, Google Developer Student Club (GDSC)
